## FRONT END WEB DEVELOPER - VUEJS

### Professional Profile

A creative, proactive and innovative Front End Web Developer with extensive experience in the design and development of applications and websites specially using VueJS, Quasar, Nuxt, Tailwind, Html, Css and Javascript/TypeScript. Demonstrates excellent analysis and programming skills derived from front-end development and coding projects. Confident in a team environment, working collaboratively or independently to /develop solutions, whilst sharing knowledge and best practice in project management. Capable of multi-tasking, reacting quickly to changing priorities and meeting deadlines through forward planning. Dedicated to continued professional development and continually maintains knowledge of emerging technologies and industry trends.

### Career Summary

#### **Fairlyne - Paris (Remote)**

**Oct 2023 – present**

#### **FREELANCE – Front End VueJS UI Web Developer**

- The TRANSAVIA Project: Airline Ticket Resale Platform => <https://resale.transavia.com>
- The OUIGO Project: Railway Ticket Resale Platform => <https://ouigoswap.ouigo.com/resell-tickets/>

Use of a modular architecture for sharing code and functionality across Nuxt applications with « Nuxt Layers » and using « useQuery » or « tanstack/vue-query » http client for data fetching.

Integrated a consistent and scalable interface using the Atomic Design methodology (atoms, molecules, organisms), structuring reusable components based on Figma designs to facilitate mobile and desktop layouts implementation with Nuxt 3, Vue 3, Tailwind Css, + Tw variants, Reka UI and Typescript.

**Skills :** Nuxt · Tailwind CSS · VueJS · AWS · SASS · Tanstack/vue-query · Advanced CSS · Figma · JIRA · Agile Methodologies · JavaScript · JavaScript Libraries · TypeScript · I18n · Mjml · HTML Emails · Tailwind · Tailwind variants · Reka UI · Zod

- Project: Airline Ticket Resale Platform for Royal Air Maroc => [royalairmaroc.fairlyne.com](http://royalairmaroc.fairlyne.com)

Integrated a consistent and scalable interface using the Atomic Design methodology (atoms, molecules, organisms), structuring reusable components based on Figma designs to facilitate implementation with Vue 3, Sass, and Quasar Framework. This approach accelerated the delivery of responsive and accessible interfaces, reducing design debt and preventing inconsistencies in the final product.

Application developed with Quasar framework 2.14.7 + Vue.js 3 using Pinia store, Axios, and Vitest.

All this applying the principles of "Atomic design," organizing the components in a coherent and hierarchical manner into atoms, molecules, organisms, templates, and pages.

Tracking, bug fixing, and creation of new features using Jira/Confluence as the main project management tool.

- **Skills:** VueJS 3, Quasar Framework, Pinia store, VueUse, ES6+, Sass, HTML5, Axios, RWD mobile first, Git, Jira, Figma, RESTful API, Postman, Swagger
- Back-end: Java, AWS
- Methodology: Agile and Kanban
- Testing: Vitest, Cypress
- Other tools: Swagger, Postman, JIRA, Figma, Sonar, Sentry, Gitlab

***Prada Group - (Retail Luxury Goods and Jewellery) - Milan (Remote)*****FREELANCE – Front End Vue UI Web Developer****Mar 2023 – Jul**

Frontend Web Developer for the new module “logged area” in order to achieve a modern Vue 3 stack from a legacy code.

Writing technical docs as required using reverse engineering, debugging, and analysing to understand the design, structure, and functionality of a product, system, or technology by deconstructing and examining its components, architecture and behaviour for <https://www.miumiu.com> and <https://www.prada.com>

Bug tracking, fixing and creation of new features using Jira as a main project manager.

Stack front: VueJS 2/3, VueX, ES6+, JQuery, Sass, Tailwind Css, Html5, Responsive Web Design, Git, Jira, Figma, RESTful api, Postman

UI implementation using the latest Bootstrap vue version with HTML5/ Sass / ES6+ best practices and done in atomic component design with VueJS 3 and Vite, Sass, Bootstrap, Figma, Miro and of course in Responsive web Design (RWD)

Stack front: VueJS 3, (composition api), Pinia store, ES6+, Sass, Bootstrap Vue, Html5, Responsive Web Design, Git, AWS, S3 bucket, Jira, Miro, Figma, RESTful, Swagger, Postman

Stack Back: Python, Dynamo DB, AWS Lambda, AWS S3

Testing: Jest, Vue test outils,

Methodology: Agile, Kamban

***Infopro Digital*****FREELANCE – Front End Web Developer****Jan 2019 – Dec 2021**

- **A few Vuejs** projects. Development for building a back & middle office administration panel.

<https://pmp.infopro-digital-automotive.com/>

Main task for this project:

- Project configuration files such webpack,
- Language management support for this multilingual app (I18n vue module)
- Component creation
- ES6 coding code
- Vuetify integration
- Store data manipulation with VueX and VuePersist

- 6 months mini project using “Quasar framework” to build <https://www.luxepack.com/> website.

Tech stack: Vuejs, Vuetify, VueX, Quasar, VueMaterial, Swagger, Postman, Json api & RESTful Services, Webpack, Sass, Css3, Responsive, Readmine, Git, Figma, Sketch, Jira

---

**FREELANCE – Front End Web Developer**

**Saint-Gobain Distribution** <https://carrieres.sgdb-france.fr/>

**Nov 2016 – Dec 2018**

- Secured and completed multiple concurrent front end web development projects for a diverse range of clients working on-site and remotely
- Optimised Agile and Kanban methodologies and created web coding using HTML5, Sass, Css3, jQuery, Gulp, JavaScript, npm, Json, Responsive
- Project tools utilised in web development included Postman, Jira, Gulp and Grunt, Swagger and Postman, Git version control and Thymeleaf templating

*Saint-Gobain Distribution (Nov 2017 – Dec 2018)*

- Developed and built the back end for a range of dedicated websites using Vue.js, Vue Material and Json webservices for service description, requests and responses

*Point.P [www.pointp.fr](http://www.pointp.fr) (Apr 2017 – Jun 2017)*

- Built the front end of the Point.P website using Git versioning and Thymeleaf templating, guaranteeing no errors and cross-platform viewing

*SFIC [www.e-sfic.fr](http://www.e-sfic.fr) (Sep 2016 – Mar 2017)*

- Primarily utilised HTML5, Sass, Css3, jQuery, Gulp, JavaScript, npm, Json and Responsive to build a website for the first national network of specialists in interior design

*Brossette [www.brossette.fr](http://www.brossette.fr) (Jun 2016 – Oct 2016)*

- Built a responsive website for a heating distributor, sanitary and plumbing specialist using Thymeleaf templating and Git versioning

*Décocéram [www.decoceram.fr](http://www.decoceram.fr) (Apr 2016 – Jul 2016)*

- Created web coding using HTML5, Sass, Css3, jQuery, Gulp, JavaScript, npm, Json, Responsive Web Design to code the website and web app designs

*Asturienne [www.asturienne.fr](http://www.asturienne.fr) (Apr 2016 – Jul 2016)*

- Fully utilised a comprehensive skillset in web development to build a responsive, cross-browser website for a specialist in roofing materials

*Donkeycode [www.1000kmacheval.fr](http://www.1000kmacheval.fr) (Nov 2016 – Dec 2016)*

- Completed a mobile project using Responsive Web Design for the brand new ‘1000km à cheval’ site for Equidia Group using diverse coding and tools including Ajax, Twig, Symphony 2 and Trello

**PIXMANIA [www.pixmania.fr](http://www.pixmania.fr)**

**Sep 2015 – Oct 2016**

**Freelance Team Lead Front Office**

- Project managed mobile and desktop development for the Pixmania site, including jQuery plugins, integration with Photoshop and image conversion for retina devices
- Developed the layout using CSS3 and Sass/Stylus, encompassing the creation of all mixins, includes, partials, extends and operators
- Created templates using HTML5 with suitable Twig or Smarty engines for PHP and custom plugins using jQuery, Zepto and Hammer
- Developed custom ‘touch events’ designed for mobile screens and ‘multi-touch’ using Zepto and Hammer.js to enable pinch, swipe and drag

**E-MERCHANT**

**Feb 2014 – Aug 2016**

**Team Manager/Scrum Master/Front End Lead**

- Led 7 staff on the agile development team and managed various projects as a Scrum Master from initial planning to progress tracking
- Controlled and managed all project documentation and technical specifications using best practice for a smooth flow of information
- Managed team activities in testing and technical support, Jira task delegation and assignment of tickets to resolve any technical issues
- Undertook code-writing 20% per week whilst primarily managing mobile projects in Responsive Web Design (RWD) for multiple business websites
- Maximised the use of HTML, CSS, Gulp, Grunt, Stylus, Less, Zepto, jQuery, JavaScript, Ender, Svn, Putty, Git, Smarty, PHP, Jira, Fiddler, Putty and Wamp

**MAZARINE DIGITAL**

**Nov 2013 – Jan 2014**

**Front End Developer**

- Managed several projects including development of a mobile website in Responsive Web Design (Android & IOS) for Valentino ‘Uomo’
- Created image slicing services using SASS, SCSS and HTML5, specifically focusing on retina devices and created templates with Twig PHP template engine
- Developed ‘touch events’ for mobile devices, including ‘multi-touch’ for pinch, swipe and drag functions using Zepto and Hammer.js

- Developed a content management system (CMS) with 'eZ Publish' to facilitate control of websites, intranets and blogs, mobiles and tablets

## L'ORÉAL PARIS

Oct 2012 – Oct 2013

### Front End Web Developer

- Primarily assigned to development of the 'Le Club des Créateurs de Beauté" website [www.ccbparis.fr](http://www.ccbparis.fr) from technical documentation and specifications
- Facilitated plugin integration with jQuery UI, Photoshop slicing and HTML5 integration using CSS3, HTML5 and custom jQuery methods
- Utilised handmade Responsive Web Design and web development techniques to create and test handmade sliders and carousels

## ACCOR HOTELS

Jan 2009 – May 2012

### Front End Web Developer

- Gathered requirements for projects to fulfil all web development needs and delivery control for a range of web agencies and hotel clients.
- Managed projects end-to-end using efficient schedule management and progress monitoring through to testing, support and completion.
- Compiled technical documents and specifications for web development projects to translate into functional solutions, including custom development.
- Delivered analytics, XITI and banner management using Open AdStream 'OAS', social media widget design and flash animations using SWFObject

### Earlier experience:

#### Bouygues Immobilier – Front End Web Developer

Oct 2007 – Oct 2008

#### Professional Development

##### Discover Vue.js – LinkedIn Learning

Apr 2017 – Apr 2018

#### Key IT Skills

Vue.js, Quasar, ES6, JavaScript, HTML5, Css3, Sass, Less, Stylus, Webpack, Gulp, Grunt, Vue Material, Vuetify, Bootstrap
