FRONT END UI WEB DEVELOPER – VUEJS / QUASAR / NUXT

Professional Profile

Front-End Web developer with 15+ years of experience building **scalable, high-performance, and responsive web applications**. Specialized in **Vue 3, Quasar framework, Nuxt 4 and Tailwind CSS/ Bootstrap** to develop modern UI systems for **enterprise, e-commerce, and SaaS platforms**. Skilled in **modular front-end architecture**, **atomic design systems**, and **cross-functional collaboration** with design and backend teams.

Demonstrated success in improving web performance, reducing technical debt, and optimizing developer workflows using **modern frameworks, reusable components, and CI/CD pipelines**.

Core Competencies:
Front-End Development • Vue.js 2/3 • Nuxt 3/4 • Tailwind CSS • Tailwind variants • Bootstrap • Vuetify • TypeScript • JavaScript (ES6+) • Responsive Web Design (RWD) • UI Implementation • Component Libraries • Atomic Design • SOLID principles • Agile Methodologies • RESTful APIs • Figma • Git • Unit Testing • Cypress • Vitest • Playwright • Vite • Vue Query • Axios • Sass • Less • Stylus • Html • Mjml • Email templates • Twig • AWS/S3 • Lighthouse • Swagger • Jira • Scrum and agile methodologies

---

Career Summary

Fairlyne – Paris, France (Remote)

Front-End Developer (Vue.js / Nuxt / Quasar framework / Tailwind) | Oct 2023 – Oct 2025

- **Engineered** a shared modular architecture with **Nuxt Layers** and **Vue Query**, enabling 3 enterprise web apps to share over **70% of UI code**, accelerating release cycles by **40%**.
- **Built and maintained** a **scalable Atomic Design system** with 100+ reusable Vue 3 components, enhancing design consistency and reducing rework across product teams.
- **Optimized** UI performance through lazy loading, code-splitting, and Tailwind variants, resulting in **Lighthouse scores above 90** and faster user interactions.
- **Collaborated** with designers and backend engineers to align UX/UI goals with business requirements, improving time-to-market and overall development efficiency.
- **Elevated accessibility and responsiveness** across platforms, ensuring pixel-perfect mobile and desktop experiences for brands like **Transavia**, **OUIGO**, and **Royal Air Maroc**.

Prada Group – Milan, Italy (Remote)

Front-End Vue Developer | Mar 2023 – Jul 2023

- **Modernized** the front-end architecture for **miumiu.com** and **prada.com**, migrating from Vue 2 to Vue 3 and improving maintainability and scalability.
- **Enhanced performance** by optimizing routing and asset delivery, reducing load times by **25%** and improving SEO scores across mobile and desktop.

- **Reverse-engineered** legacy code to produce detailed documentation, supporting faster onboarding for new developers and smoother maintenance cycles.
- **Partnered** with product and design teams to ensure flawless component delivery aligned with Figma specifications and accessibility standards.

Der Grüne Punkt – Duales System Deutschland GmbH (Remote)

Front-End Web Developer (Vue 3 / Vite / Bootstrap 5) | Apr 2022 – Feb 2023

- **Developed** the **NV1RO Dashboard**, a real-time analytics platform for sustainability data, improving operational visibility for internal users.
- **Implemented** responsive UI frameworks that boosted usability and accessibility by **35%**, validated through end-user testing.
- **Integrated** AWS-based CI/CD pipelines and automated deployments, reducing release errors and deployment time by **20%**.
- **Strengthened code reliability** by introducing Jest and Vue Test Utils, cutting regression incidents by **25%** across sprints.

Infopro Digital – Paris, France (Remote)

Front-End Developer (Vue.js / Quasar / Vuetify) | Jan 2019 – Dec 2021

- **Delivered** a **multi-tenant back-office platform** serving 10+ B2B clients, using Vue.js, Vuetify, and Quasar for modular, maintainable interfaces.
- **Implemented** an I18n localization architecture that reduced translation update times by **50%**, improving international rollout speed.
- **Streamlined** project setup through optimized Webpack configurations and Vue CLI, decreasing build times and simplifying environment management.
- **Partnered** with UX designers to enhance user journeys, increasing engagement and feature adoption across client platforms.

Saint-Gobain Distribution – Paris, France (Remote)

Front-End Developer (Vue.js / HTML / Sass) | Nov 2016 – Dec 2018

- **Built and maintained** multiple B2B ecommerce sites (Point.P, SFIC, Brossette, Décocéram, Asturienne) using Vue.js and responsive design principles.
- **Automated** build and deployment pipelines with Gulp and Git, reducing manual errors by **40%** and improving release reliability.
- **Integrated** RESTful APIs and collaborated with cross-functional teams under Agile frameworks to ensure high-quality, on-time feature delivery.
- **Elevated** front-end consistency and maintainability across brands by implementing a unified component structure and CSS methodology.

Earlier Career (2007–2016)

Front-End and leadership roles with **Pixmania**, **L'Oréal**, **Accor Hotels**, **Mazarine Digital**, and **Bouygues Immobilier**.

- **Directed** a team of 7 developers as **Scrum Master / Front-End Lead**, boosting sprint velocity by **30%** through improved task delegation and workflow optimization.
- **Launched** mobile-first redesigns for luxury and retail brands, increasing engagement and retention through faster load times and improved UX.
- **Delivered** responsive, cross-browser sites for high-traffic clients, combining modern front-end practices with accessibility compliance.
